## WHAT THE BULL?

NO GATE KEEPERS • FULLY DECENTRALIZED  
100% COMMUNITY ENABLED • NO RUG PULLS

FOMO BULL CLUB is a members-only, decentralized launchpad and liquidity club. It initially supports memecoins on the Base blockchain and is set to expand its platform to include Solana, Ethereum,, Manta Network, and SUI.

Member NFT holders propose and vote on either the launch of new or the re-launch of existing memecoins on FMBC, by contributing to their launch liquidity pools.

Launches are fully automated, decentralized, and created with liquidity farming, LPT staking, and LPT farming. This approach grants memecoins launched on FMBC instant utility and maximized sustainability.

Once the minimum required for a memecoin launch pool has been staked by members (LPs), the pool is automatically created on a leading DEX like Uniswap and then shared with non-club members of our herd and the general public.

Memecoins are immediately distributed to LP's wallets without any lockups or vesting. Smart contracts are audited, and ownership is renounced with zero possibility of a rug pull.

## COMPLETE FOMO

Staking for new memecoins is available on a first-come, first-served basis to Member NFT holders. Once a memecoin is created, it can be traded only on DEXs.

Re-launched memecoins are launched at the lowest-ever recorded price of the original coin.

Member NFT holders who grab first dibs on these launches before the general public enjoy unparalleled upside potential akin to the original meme coin launches.

FMBC merges meme virality with robust DeFi mechanics to create a vibrant community-led hub. This hub not only rewards participation but also acts as a catalyst, proposing and propelling memecoins to new heights and offering members front-row seats to the next big crypto wave.

Batch #1 of proposed memecoin re-launches up for member vote:

## OUR MISSION

Igniting the spirit of the crypto community by bringing back the FOMO & BULL.

We're crafting an exclusive, decentralized playground for all the relentless bulls out there, eager for their moment in the spotlight.

Missed the early crypto craze? No worries!

FMBC is here to reopen the doors to the world of memecoins, offering you a fresh chance to ride the wave of extraordinary gains.

## THE HERD

### EMPOWERING THE COMMUNITY

At the heart of FMBC's groundbreaking approach to memecoin launches lies THE HERD, an expansive community extending far beyond our 9100 Member NFT holders.

This diverse and engaged group of community members, media partners, KOLs, and degens is the driving force behind the success of every memecoin launch on our platform.

THE HERD represents a collective of enthusiastic participants, each playing a crucial role in promoting and supporting new memecoins within the FMBC ecosystem.

Their involvement goes beyond mere investment; they are the ambassadors of our vision, spreading the word and ensuring that each launch achieves its full potential.

By harnessing the power of THE HERD, FMBC sets a new standard for community-driven success in the world of memecoins.

# TOKENOMICS

## INTRODUCTION

Fomo Bull Club is a decentralized launchpad and liquidity hub supporting primary and secondary token markets for community-launched memecoin projects.

Platform membership is gained via an NFT collection, and utility is captured between by FMBC in two ways:

- 1.The social currency is used to stake in launch pools and vote for the launch of new meme coins.
- 2.The liquidity token acts as a conduit that reserves liquidity for all the tokens on the platform.

# CAPITAL OF THE HERD

## UTILITY FUNCTION

Memecoins are launched via Member proposals and votes by deploying the minimum required launch pool capital in \$FOMO/\$USDT

Once the minimum is reached, the memecoin is automatically launched with the USDT from the launch pool and an equivalent value of memecoin tokens.

This serves as the initial liquidity pool on Uniswap or another leading DEX. The staked \$FOMO is then returned, and memecoins are distributed immediately to launch pool participants (LPs).

## \$FOMO BURN

A platform fee is charged on successfully launched memecoin pools and paid for from the launch liquidity pool in the currency of the memecoin's trading pair.

A portion of the fee is used to buy back \$FOMO on DEXs and burn them to decrease the overall supply.

Where we assign the variable  $S$  as the ratio of total staked \$FOMO tokens to the current circulating supply, the burn rate  $B$  is calculated simply as:

$$B = 1 - S$$

The residual is distributed as \$FOMO tokens to the \$FOMO Staking pools on a stake pro-rata basis.

# BULLIONAIRES

The maximum supply of \$FOMO is fixed at 100 billion tokens that are issued as follows (noting that all vesting is linear).

## RISK WARNING

Investing in FMBC (\$FOMO) and any tokens launched on the FMBC launchpad carries inherent risks. The cryptocurrency market is known for its volatility, and the value of \$FOMO tokens can experience unpredictable fluctuations. Regulatory changes may impact the legal status of the project, while technological vulnerabilities, governance decisions, and external threats pose additional risks. Lack of liquidity and adoption challenges further contribute to potential financial losses. Investors should conduct thorough research, consider their risk tolerance, and be aware that investing in \$FOMO involves the risk of losing their entire investment. This risk warning is not exhaustive, and individuals should seek independent advice before participating in the FMBC project.

## LEGAL DISCLAIMER

This document (the "Whitepaper") is for informational purposes only and does not constitute an offer or solicitation to sell shares or securities in FMBC (the project) or any related or associated entity. This Whitepaper does not constitute or form part of any opinion on any advice to sell, or any solicitation of any offer by the issuer of \$FOMO or any other entity, security, or investment. No securities regulatory authority has expressed an opinion about these securities, and it is an offense to claim otherwise.

\$FOMO tokens are not intended to be securities in any jurisdiction. The information contained in this Whitepaper may be subject to change and may be updated from time to time.
